#### GROUP HOMES FOR THE DEVELOPMENTALLY DISABLED

- 1. The facility's street address is painted or posted against a contrasting background so that the group home's street address is visible from the street; or
- 2. The local emergency response team, such as the local fire department, is notified of the location of the facility in writing at least once every 12 months. The licensee shall make the written notification available for review at the facility for at least two years from the date of the notification.

#### **C.** A licensee shall ensure that:

- 1. Except as described in subsection (D), an evacuation drill that includes all residents, except any residents otherwise specifically excluded from evacuation drills as indicated on documentation provided by the Division for the resident, is conducted at least once every six months on each shift; and
- 2. Documentation of an evacuation drill is available for review at the facility for at least two years after the date of the evacuation drill that includes:
  - a. The date and time of the evacuation drill;
  - b. The length of time to evacuate or simulate the evacuation of all residents from the facility;
  - c. A summary of the evacuation drill, including a list of the residents and staff who were present at the time of the drill, how the drill was performed, how long the drill took to complete, and, if applicable, a list of residents for whom evacuation was simulated; and
  - d. Except as provided in subsection (D)(2), if the length of time to evacuate all residents from the facility exceeds three minutes, a plan of correction to bring the evacuation time to three minutes or less in case of an actual emergency requiring evacuation.
- **D.** If a group home provides services to a resident whom the Division has identified, through the assessment process used to determine the group home's fire risk prevention level, as having a condition that could cause a resident to be harmed if the resident participated in an evacuation drill, a licensee shall ensure that:
  - 1. An evacuation drill:
    - a. Does not include the resident, and
    - b. Simulates the evacuation of the resident according to the plan required in subsection (A)(3)(c), and
  - 2. The documentation of an evacuation drill required in subsection (C)(2) also includes, if the length of time to evacuate or simulate the evacuation of all residents exceeds five minutes, a plan of correction to bring the evacuation time to five minutes or less in case of an actual emergency requiring evacuation.

1. A first aid kit is available in the facility that has the following items in a quantity sufficient to meet the needs of residents and staff:  a. Adhesive sterile bandages of assorted sizes. b. Sterile gauze pads, c. Sterile gauze pads, d. Adhesive or self-adhering tape, e. Antiseptic solution or sealed antiseptic wipes, f. Re-closable plastic bags of at least one-gallon size. g. Single-use non-porous gloves, h. Scissors, i. Tweezers, and j. A cardiopulmonary resuscitation mouth guard or mouth shield: 2. All stairways, hallways, walkways, and other routes of evacuation are free of any obstacle that may prevent evacuation of a resident in an emergency; 3. If a window or door contains locks, bars, grills, or other devices that obstruct evacuation, each device contains a release mechanism that is operable from the inside of a facility and that does not require the use of a key, special knowledge, or special effort; 4. Each facility contains a working non-cellular telephone that is available and accessible to staff and each resident at all times; and 5. The following are posted at the location of a facility's telephone: a. Instructions to dial 911 or the telephone number of another local emergency response team, and b. The address and telephone number of the group home.  R9-33-202. Fire Safety Requirements  A. The Department shall issue to an applicant or licensee: 1. A fire risk prevention level 2 group home license if the group home meets the requirements in subsections (B) through (G); and 2. A fire risk prevention level 2 group home license if the group home meets the requirements in subsections (B) through (H).  B. A licensee shall ensure that the premises are in compliance with all applicable state and local fire safety regulations and that:	E.	A lice	nsee shall ensure that:		
needs of residents and staff: a. Adhesive sterile bandages of assorted sizes, b. Sterile gauze pads, c. Sterile gauze pads, d. Adhesive or self-adhering tape, e. 		all app			
, and the second		1.	Before a license is issued or renewed, a fire		
inspection is conducted by the local fire			inspection is conducted by the local fire		

- department, the Department, or an entity authorized by the Department;
- 2. Any repair or correction stated in a fire inspection report is made or corrected according to the requirements and time in the fire inspection report; and
- 3. A current fire inspection report is available for review at the group home.
- C. A licensee shall ensure that the facility has at least one a working, portable, all-purpose fire extinguisher labeled as rated at least 2A-10-BC by Underwriters Laboratories, or two colocated working, portable, all-purpose fire extinguishers labeled as rated at least 1A-10-BC by Underwriters Laboratories, installed and maintained in the facility as prescribed by the manufacturer or the fire authority having jurisdiction.
- **D.** A licensee shall ensure that a fire extinguisher is:
  - 1. Is either:
    - a. Disposable and has a charge indicator showing green or "ready" status; or
    - Serviced at least once every 12 months by a fire extinguisher technician certified by the National Fire Protection Agency, the International Code Council, or Compliance Services and Assessments; and
  - 2. If serviced, is tagged specifying:
    - a. The date of purchase or the date of recharging, whichever is more recent; and
    - b. The name of the organization performing the service, if applicable.
- **E.** A licensee shall ensure that smoke detectors are:
  - 1. Working and audible at a level of 75db from the location of each bed used by a resident in the facility;
  - 2. Capable of alerting all residents in the facility, including a resident with a mobility or sensory impairment;
  - 3. Installed according to the manufacturer's instructions;
  - 4. Located in at least the following areas:
    - a. Each bedroom;
    - b. Each room or hallway adjacent to a bedroom, except a bathroom or a laundry room; and
    - c. Each room or hallway adjacent to the kitchen, except a bathroom, a pantry, or a laundry room; and
  - 5. If the licensee has been cited more than once in the previous four years under subsections (E)(1) through (4), either:
    - a. Hard-wired to the electrical system of the group home with a battery backup; or
    - b. Connected to an early-warning fire detection system required in subsection (H)(2), if applicable.

- **F.** A licensee shall ensure that each bedroom has at least one openable window or door to the outside for use as an emergency exit.
- **G.** A licensee shall ensure that:
  - 1. A usable fireplace is covered by a protective screen or covering at all times; and
  - 2. Combustible or flammable materials are not stored within three feet of a furnace, heater, or water heater, or usable fireplace.
- **H.** A licensee of a fire risk prevention level 2 group home shall ensure that:
  - 1. The facility contains an emergency lighting system that:
    - a. Works without in-house electrical power,
    - b. Illuminates the path of evacuation, and
    - c. Is inspected at least once every 12 months by the manufacturer or an entity that installs and repairs emergency lighting systems; and
  - 2. The facility has an early-warning fire detection system that:
    - a. Is safety-approved;
    - b. Is hard-wired or connected wirelessly, with battery back-up;
    - c. Sounds every alarm in the facility when smoke is detected:
    - d. Is installed in each bedroom, each room or each hallway adjacent to a bedroom, and each room or each hallway adjacent to a kitchen; and
    - e. Is inspected at least once every 12 months by the manufacturer or by an entity that installs and repairs early-warning fire detection systems;
  - 3. The facility has one of the following:
    - a. Sufficient staff on duty to evacuate all residents present at the facility within three minutes or, if applicable under R9-33-201(D), within five minutes; or
    - b. An automatic sprinkler system installed according to the applicable standard incorporated by reference in A.A.C. R9-1-412 and installed according to NFPA 13, NFPA 13R, or NFPA 13D, as applicable, that:
      - i. Covers every room in the facility; and
      - ii. Is inspected at least once every 12 months by the manufacturer or by an entity that installs and repairs automatic sprinkler systems; and
  - 4. Documentation is available at the facility for two years after the date of an inspection:
    - a. For:
      - i. The emergency lighting system inspection required in subsection

The premises do not contain unfenced or uncovered wells, ditches, or holes into which an individual may step or fall.  7. R9-33-204. Environmental Requirements  4. A licensee shall ensure that: 1. The premises are free of accumulations of garbage or refuse; 2. Garbage and refuse in the facility are: a. Stored in cleanable containers or in sealable plastic bags; and b. Removed from the facility at least once every seven days; 3. Cleaning compounds and toxic substances are maintained in labeled containers that: a. Are stored to prevent a hazard; b. Are appropriate to the contents of each container; c. It appropriate based on a resident's disability, are locked; and d. Are stored in a separate location from food or medicine; 4. Unused furniture, equipment, fabrics, or devices are removed from the facility or maintained in a covered area on the premises that is designated by	C.					
approved, safe, and in working order;  3. Electrical outlets on the premises are safe, covered with a faceplate, and installed in accordance with the requirements of the local jurisdiction;  4. If the facility was built or modified on or after the effective date of this Chapter, any electrical outlet located within 3 feet of a water source includes a ground fault circuit interrupt (GFCl);  5. An appliance, light, or other device with a frayed or spliced electrical cord is not used on the premises; and  6. An electrical cord is not used on the premises is not:  a. Used as a substitute for permanent wiring, b. Run under a rug or carpeting, c. Run over a nail, or d. Run from one room to another.  A licensee shall ensure that:  1. A facility contains a safe, working plumbing system; and connective piping are free of visible leakage; and  3. The premises do not contain unfenced or uncovered wells, ditches, or holes into which an individual may step or fall.  R9-33-204. Environmental Requirements  A. A licensee shall ensure that:  1. The premises are free of accumulations of garbage or refuse; 2. Garbage and refuse in the facility are: a. Stored in cleanable containers or in sealable plastic bags; and b. Removed from the facility at least once every seven days; 3. Cleaning compounds and toxic substances are maintained in labeled containers that: a. Are stored to prevent a hazard; b. Are appropriate to the contents of each container; c. If appropriate based on a resident's disability, are locked; and d. Are stored in nepremises that is designated by		1.	Electrical lighting is contained in each room in the	facility;		
3. Electrical outlets on the premises are safe, covered with a faceplate, and installed in accordance with the requirements of the local jurisdiction:  4. If the facility was built or modified on or after the effective date of this Chapter, any electrical outlet located within 3 feet of a water source includes a ground fault circuit interrupt (GFCI);  5. An appliance, light, or other device with a frayed or spliced electrical cord is not used on the premises; and  6. An electrical cord, including an extension cord, on the premises is not:  a. Used as a substitute for permanent wiring, b. Run under a rug or carpeting, c. Run over a nail, or d. Run from one room to another.  7. A licensee shall ensure that: 1. A facility's plumbing system is connected to a non-municipal sewage disposal system, the plumbing system and connective piping are free of visible leakage; and  7. The premises do not contain unfenced or uncovered wells, ditches, or holes into which an individual may step or fall.  8. A licensee shall ensure that: 1. The premises are free of accumulations of garbage or refuse; 2. Garbage and refuse in the facility are: a. Stored in cleanable containers or in sealable plastic bags; and b. Removed from the facility are: a. Are stored to prevent a hazard; b. Are appropriate to the contents of each container: c. If appropriate based on a resident's disability, are locked; and d. Are stored in a separate location from food or medicine; 4. Unused furniture, equipment, fabrics, or devices are removed from the facility or maintained in a covered area on the premises that is designated by		2. R9-33-	-206.	<b>Swimming Pool Requirements</b>		
		ded in subsection (B), a licensee shall ensure that a	□ In	☐ Out/Note:
	_	residential swimming pool on the premises:		
1.		with water, is surrounded by a fence or enclosure		
		cted of rigid material that:		
		Is at least 5 feet high;		
	b.	Is free of an opening that exceeds 4 inches or, if a wire		
		mesh fence, is free of an opening that exceeds 1 3/4		
	0	inches;		
	c.	Is free of openings for handholds or footholds on the exterior of the fence or enclosure;		
	d	Is at least 20 inches from the edge of the private		
	<b>.</b>	residential swimming pool;		
	e.	Is clear of objects out to a distance of 30 inches on		
		either side of the fence or enclosure from the level of		
		the ground to a height of 5 feet above the fence or enclosure;		
	f.	Has at least one gate that:		
	g.	Opens outward from the private residential swimming pool,		
	h.	Has a self-closing latch attached no less than 54 inches		
		above ground level as measured from the exterior side		
		of the fence or enclosure, and		
	i.	Is locked when the private residential swimming pool is		
		not in use;		
	j.	Is secured perpendicular to level ground; and		
	k.	Is located at least 54 inches from the exterior wall of		
		the facility to allow evacuation without entering the		
2	In not 1	private residential swimming pool area;		
2. 3.		ocated in the path of an emergency exit; with water, is equipped with the following:		
٥.		An operational water circulation system that clarifies		
	u.	the swimming pool water,		
	b.	An operational vacuum cleaning system that maintains		
		the sides and bottom of the pool free of dirt and debris,		
	c.	A shepherd's crook that is attached to its own pole, and		
		A ring buoy with an attached rope that is at least 10 feet		
		long plus the distance from the edge to the middle of		
		the private residential swimming pool; and		
4.	If not fi	lled with water, is covered completely by a covering		

#### GROUP HOMES FOR THE DEVELOPMENTALLY DISABLED

		that:	
		a. Is permitted by the local jurisdiction,	
		b. Is free of an opening that exceeds 1 inch,	
		c. Withstands weight of at least 495 pounds per square	
		foot on all parts of the covering without any distortion	
		or compression, and	
		d. Has at least one access hatch that is locked so that a	
		resident cannot open it.	
В.		The requirements in subsection (A) do not apply to a group	
		home if the Division provides to the Department written	
		documentation indicating that the Division has determined that	
		the private residential swimming pool is safe, based upon the	
		functional level of the residents:	
	1.	At the time of initial licensure,	
	2.	At the time of license renewal, and	
	3.	Upon the placement of a resident at the group home.	
C.		A licensee shall ensure that a spa:	
	1.	Except as specified in subsection (C)(2), is covered and	
		locked when not in use, with a mechanism that a resident	
		cannot open; and	
	2.	If a resident is under 6 years of age, is enclosed by a fence	
		specified in subsection $(A)(1)$ .	

A NOTE TO LICENSEES ABOUT CHANGE OF LOCATION: If faced with a need to relocate, please be advised that the new home will have to meet all of the applicable standards, including those for swimming pools. Therefore, please use this checklist to ensure that a potential home meets these minimum standards BEFORE signing a lease agreement as there are no provisions for waivers of these standards. ADHS is available to provide you with technical assistance in making such evaluations by calling the Office of Special Licensing at (602) 364-2079.

**A NOTE TO LICENSEES ABOUT VEHICLE INSPECTIONS:** Please be advised that our inspection process requires that the facilities have all vehicles used to transport residents to be present at the facility at the time of inspection. Those vehicles NOT present at the time of inspection will have to be brought down to ADHS offices to be inspected before the license can be issued or renewed. Please plan accordingly.
